
Break Through Your Workflow Barriers With 3DQuorum™. Our Highest Resolution 3D™ Imaging, Faster

At [Hologic](#), we understand the importance of reducing imaging interpretation time, especially during a time when you might be facing with a backlog in breast cancer screening appointments.

We are therefore very pleased to introduce 3DQuorum breast imaging technology.

Designed to expedite Hologic Clarity™ HD high-resolution 3D Mammography™ exam read times, [3DQuorum](#) uses Genius AI™ to reconstruct the data into 6mm SmartSlices, ensuring there is no loss of image data for optimal cancer detection.¹⁻²

With a 2/3 reduction in the number of images to review, 3DQuorum saves up to 1 hour of interpretation time per day, helping you to break through your workflow barriers.
