About Edwards Lifesciences:

At **Edwards Lifesciences**, we strive to provide you with the valuable information you need, the moment you need it. From the very first *Swan-Ganz* pulmonary artery catheter, to the *FloTrac* sensor, *PreSep* oximetry catheter and *EV1000* clinical platform, and now the latest innovations: *ccNexfin* system and *GlucoClear* continuous glucose monitoring – our goal remains: to provide you with the clarity you need, the moment you need it, in order to advance the care of the critically ill.
