

Quantum Health names Dan Shur Chief Product Officer

Quantum Health, the industry leading healthcare navigation and care coordination company announced that Dan Shur is joining its leadership team as chief product officer. In his new role, Shur will lead product innovation, strategy and development.

“Helping consumers effectively navigate through the increasingly complex healthcare landscape is more essential than ever,” said Shannon Skaggs, president of Quantum Health. “Dan shares this mission and brings extensive healthcare and technology experience, as well as a deep understanding of the ever-changing healthcare ecosystem. He also understands our key stakeholders — from consumers to providers to payers and benefit plan sponsors — and what they need to feel supported and succeed. We are thrilled to welcome Dan to Quantum Health as we continue to expand and enhance our navigation and care coordination solutions to meet the needs of our growing market.”

Shur has over 25 years’ experience creating and building innovative technology strategies and solutions for organizations across the healthcare landscape. Prior to joining Quantum Health, he led product strategy and development for multiple companies within GuideWell Venture Group. Before GuideWell, he led innovation and growth at two healthtech organizations, Cloudbreak Health (telemedicine) and Progyny (fertility benefits). Earlier in his career, Shur also led multiple product strategy and development initiatives at EmblemHealth and Cigna.

“I empathize deeply with people struggling to get care and I strive to make their experience better. To that end, I am always looking for ways to make healthcare more accessible, efficient and human,” said Shur. “Quantum Health is the respected leader in an area I am passionate about. I am proud to join the Quantum Health team as we help our stakeholders achieve the best experience and results, while continuing to transform the healthcare experience and break new ground in health benefits navigation.”

Shur holds a Bachelor of Arts degree from Cornell University and a Master of Business Administration from Cornell’s Samuel Curtis Johnson Graduate School of Management, including a prestigious Park Leadership fellowship.
