
Real-time Imaging for Instant Sample Verification during Breast Biopsy Procedures

The Brevera® Breast Biopsy System helps you to make informed clinical decisions at the point of care, saving valuable time for a better patient experience.¹⁻³

Streamlining your workflow, with reduced procedural steps and real-time CorLumina® imaging, enables you to perform more biopsies, with confidence in a shorter time. This frees up valuable physician time, whilst enhancing the patient experience by reducing time under compression.¹⁻³

□

Key features and benefits of the Brevera Breast Biopsy System

- Instant tissue verification with CorLumina imaging technology¹
- Intuitive software and a high-resolution, touchscreen monitor to quickly identify faint calcifications
- Wireless connectivity to easily share images and transfer patient records
- New disposable needle, which produces 54% less waste⁴
- Remote operation and physician-controlled sampling to improve speed and efficiency
- Integrated pain management and quiet operation to help improve the patient experience
- 8-second acquisition and imaging cycle means more actionable information at the point of care¹
