

United Imaging Healthcare Installs uMammo590i for Breast Cancer Screening in Gjilan Municipality

For the first time, a screening mammography system—[United Imaging Healthcare](#)'s uMammo590i—has been installed in the Gjilan **Municipality**. This milestone achievement brings mammogram screenings to the municipality's family clinic, ensuring primary healthcare access for over ten thousand women in the community.

With its advanced design, the uMammo590i offers high-resolution imaging capabilities, particularly for dense breasts. Equipped with a tungsten X-ray tube and uDose dose control technology, this system guarantees exceptional image quality while optimizing radiation dose levels. For more detailed information about the uMammo590i, please [visit](#)

The uMammo590i makes every detail count in the early detection of breast cancer, enabling healthcare professionals to make accurate diagnoses and improve patient outcomes. Join us in the fight against breast cancer!

NeuralMed, serving as United Imaging Healthcare's representative in the Kosovo region, will ensure the system's seamless maintenance and operation, guaranteeing uninterrupted service. Having a dedicated local team highlights our commitment to delivering exceptional customer and patient care through comprehensive service and training programs.
